

Punctuation

We show the children different forms of punctuation and give them examples of how to use them. Punctuation is differentiated into Levels 1-5. The pyramid below shows differentiation in punctuation. It starts at the top with basic punctuation and progresses down to using complex skills such as speech marks and brackets.

How can you help?

- Make up fun sentences using different forms of punctuation.
- Give your child a piece of punctuation and ask them to give you a sentence using it. Over time, you will be amazed at the improvement in their understanding!
- Use a highlighter pen to highlight different forms of punctuation in old newspapers/magazines.
